SUITED VS OFFSUIT

Suited — flush possible Offsuit — no flush draw
 Suited adds ~2-3% win rate. Hand charts use "s" (suited) and "o" (offsuit).

KEY RULES

- Tight is right** — fold more hands, play better hands
- Position changes everything** — a fold in early can be a raise on the button
- Suited beats offsuit** — same cards, but flush potential adds value
- Don't chase** — if it's not in Tiers 1-3, fold it
